 - Non-judgmental & non-stigmatizing approach

HOW CAN YOU HELP?

- [Sign-on as a supporter of the campaign](#)
- Share information and resources
- Learn about and carry Narcan
- Encourage others to do the same!

WHY KNOW OVERDOSE?

Like many other communities across the state and country, Nevada County has seen a rise in overdose deaths in the past few years. This has largely been a result of fentanyl, a very strong synthetic opioid, entering the local drug supply.

Know Overdose Nevada County embraces harm reduction as an evidence-based approach to preventing overdose deaths and offering compassionate support in our community.
